Claude AI

Scalability and Efficiency

Technical Scalability

Deployed the model pipeline on VertexAI, supporting **load balancing** and **auto-scaling** for prediction
horizontal scaling: (multi-GPU training) for model training
vertical scaling: for database capacity

Current Training and Tuning

Agile Model Training

Experimenting with **ResNet18**, **VGG**, and **MobileNet** for model train

Agile Model Training

~1.5 hr

Time for update and fine-tuning

Infrastructure Consideration

GCP: for reliable data storage
Docker: for isolated and reproducible environments
VertexAI: for model deployment with good scaling ability
